About Spandidos Publications

Spandidos Publications was founded in 1992 and has developed into a leading publishing group in the biomedical sciences field. We currently publish eight journals: International Journal of Molecular Medicine, International Journal of Oncology, Molecular Medicine Reports, Oncology Reports, Experimental and Therapeutic Medicine, Oncology Letters, Biomedical Reports, Molecular and Clinical Oncology and World Academy of Sciences Journal.

All journals published by Spandidos Publications maintain the highest standards of quality and the members of their Editorial Boards are world-renowned scientists. The company has offices based in Athens and London and receives high quality submissions from authors worldwide, including Europe, the Americas, Asia, Africa and Australia.

Our main aim is to facilitate scientific communication in a clear, concise and objective manner, while striving to provide prompt publication of original works of high quality.

The group has held more than 50 conferences in the fields of oncology and molecular medicine. Our conferences are organised on an annual basis with the aim of encouraging scientific communication and clarity, and to aid the development of international collaboration between established and expanding research groups around the world.

Spandidos Publications is a member of several industry organizations, including the Association of Learned and Professional Society Publishers (ALPSP) and the Publishers International Linking Association (CrossRef). We are in the process of becoming a member of the Counting Online Usage of Networked Electronic Resources (COUNTER) and the UK Serial Group.

Spandidos Publications is also a participating member in the LOCKSS (Lots of Copies Keep Stuff Safe) initiative. LOCKSS will enable any library to maintain their own archive of content from Spandidos Publications and other publishers, with minimal technical effort.

Reasons to publish with Spandidos Publications

• High quality in-house copyediting to ensure high standards of communication
• Constructive, efficient and rapid peer review
• Rapid publication
• Included in all major bibliographic databases
• High visibility with 3,763,230 page views in 2018 and international readership in relevant fields of research (228 countries)
• Spandidos Publications makes articles freely available 12 month after the publication
• Immediate open access is also available subject to an article-processing charge
Aims and scope

The International Journal of Oncology provides an international forum for the publication of the latest, cutting-edge research in the broad area of oncology and cancer treatment. The journal accepts original high quality works and reviews on all aspects of oncology research including carcinogenesis, metastasis, epidemiology, chemotherapy and viral oncology.

Through fair and efficient peer review, the journal is dedicated to publishing top tier research in the field, offering authors rapid publication and high standards of copy-editing and production.

The International Journal of Oncology is published on a monthly basis in both print and early online.

Oncology Reports

Print ISSN: 1021-335X
Online ISSN: 1791-2431
Volume: 41 and 42 (2019)
Published monthly

Web of Science Impact Factor: 3.041
Scopus CiteScore: 3.07
Date Established: 1994

Ranked #27/229 (total number of cites) amongst journals classified in the oncology subject category (Web of Science)

Aims and scope

Oncology Reports is a monthly, peer-reviewed journal devoted to the publication of high quality original studies and reviews concerning a broad and comprehensive view of fundamental and applied research in oncology, focusing on carcinogenesis, metastasis and epidemiology.

The journal is published in both print and electronic format.

Aims and scope

The International Journal of Molecular Medicine is a monthly, peer-reviewed journal devoted to the publication of high quality studies of molecular mechanisms of human disease. The journal welcomes research on all aspects of molecular and clinical research, ranging from biochemistry to immunology, pathology, genetics, human genomics, microbiology, molecular pathogenesis, molecular cardiology, molecular surgery and molecular psychology.

The International Journal of Molecular Medicine aims to provide an insight for developing molecular tools and identifying molecular targets for the diagnosis and treatment of a diverse number of human diseases to researchers within the community.

Aims and scope

Molecular Medicine Reports is a monthly, peer-reviewed journal that includes studies devoted to molecular medicine, underscoring aspects including pharmacology, neurosciences, molecular cardiology and molecular surgery.

In vitro and in vivo studies on experimental model systems pertaining to mechanisms of a diversity of diseases offer researchers the tools and knowledge with which to aid in the diagnosis and treatment of human diseases.

Aims and scope
Experimental and Therapeutic Medicine aims to provide an expedient publication in both print and electronic format, of studies relating to biology, gene therapy, infectious disease, microbiology, molecular cardiology and molecular surgery. The journal welcomes studies pertaining to all aspects of molecular medicine, and studies relating to in vitro or in vivo experimental model systems relevant to the mechanisms of the disease are also included.

All materials submitted to this journal undergo the appropriate review via referees who are experts in this field. All materials submitted follow international guidelines with regard to approval of experiments on humans and animals.

Aims and scope

Oncology Letters is a monthly, peer-reviewed journal, available in print and online, that focuses on all aspects of clinical oncology, as well as in vitro and in vivo experimental model systems relevant to the mechanisms of the disease.

The principal aim of Oncology Letters is to provide the prompt publication of original studies of high quality that pertain to clinical oncology, chemotherapy, oncogenes, carcinogenesis, metastasis, epidemiology and viral oncology in the form of original research, reviews and case reports.

Aims and scope

International Journal of Functional Nutrition is a Journal providing rapid publication with special emphasis on Functional Nutrition by an approach that focuses on identifying solutions to significantly improve human and animal health outcomes both by in vitro and in vivo studies. This emerging nutrition model combines the very best of modern biochemistry, pharmacology, immunology, biology and genetics, and critical thinking and is being driven by increasing consumer demand. All manuscripts submitted to International Journal of Functional Nutrition are subject to review.

The International Journal of Functional Nutrition is an Open Access journal, that publishes original research in the area of Functional Nutrition.

Through fair and efficient peer review, the journal is dedicated to publishing top tier research in the field, as well as high standards of copy-editing and production.

### Article Processing Charges

Accepted manuscripts will be published on the understanding that the author(s) will pay the page charges as indicated on submission. An order form with payment details is provided at the proofs stage of manuscript submission. A PDF of the final article is provided free of charge upon publication.

**Article Processing Charges**: After final acceptance of manuscripts, authors can choose between one of the two following options to cover for publications costs.

**Option 1**: The publication charge is calculated based on the number of pages and color figures of the final accepted manuscript. All Spandidos Publications journals have the same fees for option 1.

<table>
<thead>
<tr>
<th>Basic charge (total amount for up to 5 pages)</th>
<th>EUR</th>
<th>GBP</th>
<th>USD</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>€250</td>
<td>£210</td>
<td>$325</td>
</tr>
<tr>
<td>Each additional page</td>
<td>€110</td>
<td>£90</td>
<td>$160</td>
</tr>
<tr>
<td>Reproduction in color, per page</td>
<td>€390</td>
<td>£310</td>
<td>$520</td>
</tr>
</tbody>
</table>

Color figures should only be submitted if intended for publication. Fees for color reproduction are calculated based on the figures at the time of manuscript acceptance. Figures may not be changed to black and white once a manuscript has been accepted.

**Option 2**: A fixed charge is applied irrespective of the total number of pages or color figures. In addition, the articles are made immediately available as open access and appear online at PubMed, PubMed Central and Europe PMC. This option complies with a number of funding bodies (see open access section online).
